

ABSTRACT

A device for removably mounting a hard disk drive in a memory storage housing, includes a carrier for holding a hard disk drive. The carrier being removably mountable in a memory storage device housing. The device also includes a heat sink mounted on the carrier. The carrier fans, an air filter, an air filter cover and a handle.

1. A device for removably mounting a hard disk drive in a memory storage housing, comprising:
a carrier for holding a hard disk drive;
a heat sink mounted on the carrier;
a fan mounted on the carrier;
an air filter mounted on the carrier;
an air filter cover mounted on the carrier;
a handle mounted on the carrier.
